

360 is an internet consultancy providing web development and Internet marketing services.

We have been supplying Business Credit information to leading UK companies for the last 8 years through our consumer facing ecommerce websites and have recently made this service available through the provision of Subscription Accounts to larger companies and organisations.

The ongoing success of our own ecommerce websites have been the core strength of our business since its start in 2001.

A small team of professionals we now offer our skills to UK businesses and organisations. We can operate as extension of a clients marketing & ecommerce team. Our combined knowledge of the Internet and marketing has proved invaluable to a growing portfolio of external clients.

Our own success stories provide clients with the confidence and trust in the services and advice we provide.
